PROFESSIONAL PROJECTS

CALM

Dec,2017 – Present

Serving as Lead Front-End Web Developer. Functions combined big vision ideas at conception along with deep, data-driven design across all digital mediums. Nutanix CALM adds native application orchestration and lifecycle management to the Nutanix enterprise cloud platform.

PRIME

July,2014 – Aug,2016

Part of a cross-functional team of developers, I've developed and delivered a metadata-driven UI engine built on AngularJS. This standards-based and forward-looking dynamic front-end is an integral part of Prime, a unified delivery management solution & operations platform empowering entire lifecycle right from the program start up to delivery. Designed scalable to support various software methodologies, project types and business units.

Role: Software Engineer

LIFION

Aug,2016 – Nov,2017

Part of a cross-functional team of developers, I've architected, developed, and delivered an orchestrating engine built on NodeJs. This standards-based and forward-looking dynamic service is an integral part of the Lifion human capital management platform, a bold initiative to rethink the way HR and payroll software is built.

Role: Application Developer

PERSONAL PROJECTS (SELECTED)

KING & JACK

A cards game which can accommodate a atmost 6 players with all the rules as a real-time card game. This is a multiplayer game.

Technology: NodeJS, JavaScript, React Native

TIC TAC TOE

Tic Tac Toe with a machine learning algorithm for the A.I. to player in single player mode as well as multiplayer mode

Technology: JavaScript, HTML, CSS, NodeJS

ONLINE JAVA COMPILER

This is a full-scale Java IDE which provides an online platform to edit, compile and run java code online. A company called **Internshala** is using this editor for their virtual training programs

Technology: J2EE, HTML, CSS, JQuery

CHESS GAME

Chess game with both single and multiplayer. The A.I can win with human players using the min-max and alpha pruning algorithms.

Technology : Java
